Active Radon Mitigation System

Guaranteed to reduce radon level below 4.0 pCi/L. Exceptions may apply.

This quote is for an Active Radon Mitigation System and may include some, or all of the following items. In some cases additional items may be necessary in order to guarantee a reduction in radon.

Standard Components

- Seal radon entry routes as needed
- Exhaust requirement will meet or exceed EPA standards
- Proper labeling per EPA requirements
- Installation will comply with EPA Mitigation Standards
- U-Tube fan performance indicator
- Post Mitigation Radon Test
- Radon fan located per plan
- Sub-slab/sub-membrane Single Suction Point

Job Specific Components (if necessary):

Note: It is important that you know the advantages of long-term testing and the value of a second opinion as ways of verifying test results of the proposed mitigation, especially when the mitigation is performed by the same business entity that was involved in the testing or provision of advice that led to the mitigation contract. Integrity Radon Control, LLC is not responsible for finished carpentry work such as drywall, carpet, etc.

Exceptions

The above guarantee is subject to the soil conditions and limitations of the dwelling, which will be assessed at the time of mitigation. Occasionally, unfavorable conditions make extra labor and materials necessary to reduce the level of radon to below the EPA's Action Level of 4.0 pCi/l. If additional labor and materials are necessary, additional charges may apply. Additional charges will be communicated to and approved by the client before additional work is done. Integrity Radon Control, LLC. is not responsible for electrical, plumbing and/or heating systems that may be buried in or underneath the concrete floor when drilling. Homeowner should notify Integrity Radon Control, LLC. of such systems prior to start of work. Integrity Radon Control, LLC. will make every attempt to avoid hitting these systems. Additionally, excessive ground water can impede airflow, thus requiring extensive alterations not covered in this contract.

Limited Performance Warranty

Note: This warranty is automatically transferred if this property is sold. It is the seller's responsibility to provide the buyer with this document at the closing of this property.

Performance: Fan assisted installations are warranted to test at or below 3.9 pCi/l (for a period of 7 years) using the EPA's protocol, subject to the following limitations and conditions:

1. Every two years a radon test shall be performed by a qualified professional using EPA approved follow-up protocol. These tests are performed at the owner's expense and records shall be kept, by the owner, to maintain this limited performance warranty in effect.
2. Warranty does not cover any system that has been damaged or whose performance has been compromised by natural hazards or any modification, alteration, addition or mistreatment.
3. The homeowner is responsible for the cost of diagnosing and repairing cracks or other faults that did not exist or were not exposed at time of installation.
4. This limited warranty covers performance only. Maintenance or replacement of the system is the responsibility of the owner.

5. If, at any time during the warranty period, it is determined that the radon level exceeds 3.9 pCi/l, Integrity Radon Control, LLC. shall perform such additional radon mitigation as is reasonably necessary to satisfy the warranty; provided however that the liability of Integrity Radon Control, LLC. hereunder shall in no event exceed the cost of the work under the contract. CUSTOMER MUST PROVIDE REASONABLE ACCESS, as troubleshooting is a process that could take time. IF ALL REASONABLE EFFORTS TO SATISFY THIS WARRANTY HAVE FAILED, THE OWNER'S SOLE AND EXCLUSIVE REMEDY HEREUNDER SHALL BE LIMITED TO A TOTAL REFUND OF THE CONTRACT PRICE. IN NO EVENT SHALL INTEGRITY RADON CONTROL, LLC. BE LIABLE FOR ANY DAMAGES, CONSEQUENTIAL OR INCONSEQUENTIAL, ATTRIBUTABLE TO ANY BREACH OF THIS WARRANTY, WHICH INCLUDE, WITHOUT LIMITATION, ILLNESS, PERSONAL INJURY, DAMAGE TO PROPERTY, DIMINISHED VALUE OF PROPERTY, AND STRUCTURAL OR NONSTRUCTURAL REPAIRS. WHEN APPLICABLE: OWNER TAKES ALL RESPONSIBILITY FOR THE PROPER MAINTENANCE AND OPERATION OF THE SUMP PUMP. INTEGRITY RADON CONTROL, LLC. IS NOT RESPONSIBLE FOR ANY DAMAGE ASSOCIATED WITH THE FAILURE OF THE SUMP PUMP.

Integrity Radon Control, LLC. makes no warranties, expressed or implied, other than those listed above.

I have read and understand the provisions of this limited warranty. I recognize that the charges for the installation are based, in part, on my acceptance of the terms of this limited warranty.

Limited Component Warranty

Note: This warranty is automatically transferred if this property is sold. It is the seller's responsibility to provide the buyer with this document at the closing of this property.

Materials: All materials are guaranteed to be as specified, and all work completed in a workman-like manner.

System Components: Sub-slab assisted ventilation components are warranted for five (5) years from the date of installation to function as intended by the manufacturer and are covered by the following limitations and conditions:

1. Warranty does not cover any system component that has been damaged or whose performance has been compromised by natural hazards or any modifications, alterations, additions, or mistreatment.
2. Repair and/or replacement of defective components will be performed to maintain system operation and integrity in order to maintain limited performance warranty specification during the five-year component warranty period. CUSTOMER MUST ALLOW ACCESS TO THE FAN FOR REPLACEMENT.

Liability: EPA's current acceptable risk exposure to radon is 3.9pCi/l. Any radon exposure has some risk of causing lung cancer. The lower the radon level in your home, the lower the risk of lung cancer. Every home has radon gas, but with the fan-assisted system the levels of radon can be lowered. Therefore a house with this system is safer than a home that does not have this system. Outdoor radon levels are approximately 0.4 pCi/l. So there is risk in or outside your home. INTEGRITY RADON CONTROL, LLC.'s RESPONSIBILITY AND LIABILITY UNDER THE WARRANTY IS LIMITED TO MODIFICATION AND/OR REPLACEMENT OF MITIGATION SYSTEM TO ACHIEVE THE WARRANTED SPECIFICATIONS. INTEGRITY RADON CONTROL, LLC. AND ITS EMPLOYEES SHALL NOT BE HELD LIABLE FOR ANY INCIDENTAL OR CONSEQUENTIAL DAMAGE RESULTING FROM, OR IN ANY WAY CONNECTED WITH ANY FAILURE OF SAID SYSTEM THAT MEET THE WARRANTED SPECIFICATIONS.

Integrity Radon Control, LLC. makes no warranties, expressed or implied, other than those listed above.

I have read and understand the provisions of this limited warranty. I recognize that the charges for the installation are based, in part, on my acceptance of the terms of this limited warranty.

Operations Manual: Sub-Slab Ventilation System

Note: This manual and warranty must remain with the property for use by future owners.

The function of this system is to reduce the levels of radon in the home. System performance is indicated via a visual “U Tube,” which is located in a basement, garage, closet, or other easily accessed area. When the system is functioning properly, one side of the colored liquid in the “U Tube” is higher than the other. When levels become equal, **call for service immediately**. Only a certified radon mitigation contractor shall perform work on this system.

This system works continuously and should not be shut off. With the implementation of an active radon system, the air patterns in the home can change. It is important that a carbon monoxide detector be utilized in order to warn of any dangerous carbon monoxide levels. If the sump pit cover needs to be removed, the cover must be re-sealed. If any new cracks develop, they need to be sealed with a polyurethane sealant. The fan is located either in the attic of the house or outside. **This house should be re-tested for radon gas every two years.** Call us for more details or if you have any questions.

Contract Agreement

My E-signature below and my initials above certify that I have read the terms and conditions of this contract to their fullest extent and agreed to said terms in a secure, online format.
